

## For Weed Control in Game Cover Crops

### Key Facts

|                              |   |
|------------------------------|---|
| Product Registration Number: | MAPP 13716  |
| Active Ingredient:           | 400 g/litre propyzamide                           |
| Pack Size:                   | 5.0 Litres  |
| Formulation:                 | Suspension Concentrate                            |
| Maximum Individual Dose:     | 2.1 L/ha in Game cover crops                      |
| Maximum Total Dose:          | 2.1 L/ha in Game cover crops                      |
| Latest Timing:               | Before 1 <sup>st</sup> Feb in the year of harvest |
| Water Volumes:               | 200 – 1000 L/ha                                   |
| Spray Quality:               | MEDIUM or COARSE as defined by the BCPC           |
| LERAP:                       | None  |

### Best Use Advice for Game Cover Crops

| Approval No. | Expiry Date | Crop   |
|--------------|-------------|--|
| 20082952     | 30/9/2016   | Crops grown for game cover, Outdoor all edible crops (seed crop), Outdoor all non-edible crops (seed crop), Protected forest nursery |

- Use of Kerb Flo is permitted for use in game cover where no part of the plant is to be consumed by humans or used as food or feed for animals (excluding game birds).
- More information including use rates, timing etc. are given in the Extension of Authorisation Notice which is available from CRD website - <http://secure.pesticides.gov.uk/offlabels/search.asp>

#### Game Cover species considered selective for use with Kerb Flo 400:

|                                 |                                |
|---------------------------------|--------------------------------|
| • Artichoke (globe & Jerusalem) | • Kale                         |
| • Buckwheat                     | • Mustard                      |
| • Chicory                       | • Quinoa                       |
| • Fodder radish                 | • Sunflower                    |
| • Gold of Pleasure              | • Sweet Clover                 |
| • Red Clover                    | • Tyfon cabbage/stubble turnip |

#### Game Cover species controlled with Kerb Flo:

- Canary Grass

**This extension of the authorised use provides for the use of Kerb Flo in respect of crops and situations, other than those included on the product label. No efficacy or phytotoxicity data have been assessed and as such the 'extension of use', is at all times done at the user's choosing, and the commercial risk is entirely theirs.**

### Weed Spectrum – 1.75 L/ha rate

|                            | 1.75 L/ha      |             |                      | 1.75 L/ha      |             |
|----------------------------|----------------|-------------|----------------------|----------------|-------------|
|                            | Up to 2 leaves | Established |                      | Up to 2 leaves | Established |
| <b>Annual meadow grass</b> | S              | S           | <b>Fat-hen</b>       | S              | MR          |
| <b>Barren brome</b>        | S              | S           | <b>Forget-me-not</b> | MS             | R           |
| <b>Black-bindweed</b>      | S              | MR          | <b>Knotgrass</b>     | S              | MR          |
| <b>Black nightshade</b>    | S              | MR          | <b>Redshank</b>      | S              | MR          |
| <b>Blackgrass</b>          | S              | MS          | <b>Small nettle</b>  | S              | MR          |
| Canary Grass               | S              | S           | <b>Speedwells</b>    | S              | MR          |
| <b>Cleaver</b>             | MR             | R           | <b>Vol. cereals</b>  | S              | S           |
| <b>Common Chickweed</b>    | S              | S           | <b>Wild oats</b>     | S              | S           |

Key: S – Susceptible; MS – Moderately Susceptible; MR – Moderately Resistant; R – Resistant; Bold – label weed  
Chickweed control may be reduced where it is well established
