

The following advice applies to Dow AgroSciences' ALS-inhibitor herbicides:

- Can apply a maximum of two ALS products per crop of which:
  - Only one application of an ALS product for grassweed control (i.e. one grassweed product + one broad-leaved weed product)
  - **OR** Two broad-leaved weed products.

Exceptions:

- Where florasulam is one of your ALS products then you can still make a further application of a product containing florasulam (it still counts as one) provided:
  - You do not exceed 7.5 g ai/ha per crop
  - You do not exceed 3.75 g ai/ha before 1<sup>st</sup> February
  - The florasulam does not come with pyroxsulam if an ALS graminicide has already been applied
  - You can only apply Broadway Star + 1 ALS broad-leaved weed product (no further ALS applications are permitted).

## Weed Control Programmes and Approvals

Weed Scenarios	Application 1: e.g. autumn	Application 2: e.g. late autumn/early spring	Application 3: e.g. spring	Approved
Blackgrass + volunteer beans + Spring BLW's	Spitfire 0.75 L/ha or Zypar 0.75 L/ha	UNITE or Atlantis WG	Starane XL 1.5L/ha	Yes as 1 ALS for grassweeds and 7.5g florasulam
Blackgrass + BLW's + Spring BLW's	Spitfire 0.75 L/ha or Zypar 0.75 L/ha	UNITE or Atlantis WG	Starane XL 1.5L/ha	Yes as 1 ALS for grassweeds and 7.5g florasulam
Blackgrass + BLW's + Spring BLW's	Spitfire 0.75 L/ha or Zypar 0.75 L/ha	UNITE or Atlantis WG	Ally Max SX etc.	<b>NO as no CRD approval for sequence</b>
Brome/Ryegrass/ Wild Oats + BLW's	Thor or Oriel 50SX or Lexus SX 10 g/ha	Broadway Star or Atlantis WG		Yes as 1 ALS for grassweeds and 1 ALS for BLW's
Blackgrass + BLW's + Spring BLW's	Thor or Oriel 50SX or Lexus SX 10 g/ha	Atlantis WG	Starane XL or Ally Max SX	<b>NO as no CRD approval for sequence</b>
Blackgrass + BLW's	Oriel 50SX or Lexus SX 10 g/ha	UNITE		<b>NO as no CRD approval for sequence</b>
Blackgrass + BLW's		UNITE or Atlantis WG	Spitfire 1.0 L/ha or Zypar 1.0 L/ha or Starane XL 1.5 L/ha or Ally Max SX	Yes as per approval but no further ALS products
Blackgrass	Lexus SX 20 g/ha	Atlantis WG		Yes as per approval but no further ALS products
Blackgrass	Lexus SX 20 g/ha	UNITE or Broadway Star		<b>NO as no CRD approval for sequence</b>
BLW's + meadow brome or wild oats	Thor or Oriel 50SX or Lexus SX 10 g/ha		Broadway Star 265 g/ha	Yes as 1 ALS for BLW's and 1 ALS for grassweeds
Other grassweed species + Spring BLW's		Lexus SX 20 g/ha + Broadway Star	Spitfire 0.75 L/ha or Zypar 0.75 L/ha or Ally Max SX	Yes as per approval, with 7.5g florasulam or Ally Max SX
Other grassweed species + Spring BLW's		Broadway Star 265 g/ha	Spitfire 0.75 L/ha or Zypar 0.75 L/ha or Starane XL 1.5 L/ha or Ally Max SX	Yes as 1 ALS for grassweeds and 7.5g florasulam or Ally Max SX
Volunteer beans + meadow brome or wild oats	Spitfire 0.75 L/ha or Zypar 0.75 L/ha		Broadway Star 265 g/ha	Yes as 1 ALS for grassweeds and 7.5g florasulam
BLW's + meadow brome or wild oats	Spitfire 0.75 L/ha or Zypar 0.75 L/ha	Broadway Star 265 g/ha	Ally Max SX	<b>NO as no CRD approval for sequence</b>
BLW's + meadow brome or wild oats.	Thor or Oriel 50SX or Lexus SX 10 g/ha	Broadway Star 265 g/ha	Spitfire 0.75 L/ha or Zypar 0.75 L/ha or Starane XL	<b>NO as no CRD approval for sequence</b>

**\*Please refer to the product label for the specific ALS sequence advice for each relevant product.**
